## EDUCATION

### **MAY 2020, University of North Florida**

BFA with a concentration in Graphic Design & Digital Media

Minor in Business Management

## EXPERIENCE

### **AUGUST — DECEMBER 2019**

Worked as a computer lab officer on the University of North Florida campus, where I was given a number of duties, including maintaining the lab, providing technical support for anyone using the room, and assisting lower classmen with their projects. This was done while also keeping on top of my own class work.

### **JULY — OCTOBER 2019**

Provided creative input on a youth travel baseball team rebranding. Gave direction by providing examples from existing teams, and designing logo comps, and creating mock ups of these comps being used across a variety of brand materials such as: t-shirts, baseballs, fliers, tickets, and posters.

### **JULY 2018**

Conceptualized a design for a mural in the Atlantic High gym. Did independent research on other murals and found the ideal dimensions before creating thumbs for a shark, and the school's letters. Cumulated in a vector image that would be print ready as a vinyl to go across the gym wall.

### **FEBRUARY 2017 & AUGUST 2018**

In 2017 I illustrated the front of Allen-Summerhill Funeral Home's office in DeLand Florida to be used both in print advertising, and as a sentimental piece for the office. Later, in 2018, I reformatted the design to be used as an engraving on the owner's headstone.
